# Katowice

## Architecture

Although Katowice is one of the youngest European metropolises, it has an interesting architecture. Among the Art Nouveau buildings we will find elements of eclecticism, modernism and neo – classicism. The one hundred years old workmen's housing estates Nikiszowiec and Giszowiec are unique architectural examples. Despite their primal character, they can make you feel the atmosphere of the early 19th century and move to the time of early – industrial development of Katowice. Those buildings were used in the famous Silesian film triptych directed by Kazimierz Kutz. Among other architectural monuments in Katowice, the Arch Cathedral of Christ the King and an enormous house of the former Silesian Parliament is worth mentioning.
